

This is the Electric Powered Ready to Run RoboHero Programmable Humanoid Robot  
from Thunder Tiger Robotix.

## FEATURES

Humanoid robot walks, dances, bows, performs sit ups, push ups and more...

Seventeen moveable joints

Built-in Arduino chip allows action sequences to be customized and strung together as a series of action commands

Controllable by phone APP with easy to use Arduino open source hardware and software-no cables or computers required-simply open editor on Android or iOS device and program settings

RoboHero can also be programmed via USB

Battery indicator on chest illuminates when battery is low

Perfect introduction to robotics and the STEM program for students

## INCLUDES

RTR RoboHero Programmable Humanoid Robot

7.2V 550mAh Lithium Battery

AC Wall Type Battery Charger

Quick Start Guide

## SPECIFICATIONS

**Approximate Height:** 9" (229mm)

**Width:** 4.5" (115mm)

**Depth:** 3.1" (80mm)

**Weight:** 17.6oz (500g)

**Control Methodology:** Wifi connection via Android or iOS-based device using the free TT Robotix app

**Controller:** RoboHero V3.0 (Arduino IDE-compatible)

**Servos:** 17 metal gear, 13.9oz-in torque, 0.12 sec @60° speed

**Battery:** 7.2V 550mAh Lithium

**Movement (degrees of freedom):** Head 1°, Arms 6°, Legs 10°

## COMMENTS

Also available as a kit, [TTRX1010](#).
